DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horejsi et al. 5,239,487.

Horejsi et al. teaches improving the quality of modules by identifying a module and its symptoms; storing the identifying information and symptoms in a database; retrieving the identifying and symptom information and using the information to determine a defect using a knowledge base; determining the repairs to be made on the basis of the defects; listing repair suggestions, repairing the module, testing, and updating the knowledge base. Horejsi also teaches determining the frequency of defects; determining the process responsible for the defect, use of a graphical interface, network, and workstation. See the abstract; figures; col. 3, line 26 to col. 4, line 32; col. 4, line 66 to col. 6, line 39; col. 8, line 39 to 10, line 64; col. 11, line 2 to col. 13, line 55; col. 15, lines 1-13.

Horejsi however does not log a repair suggestion, repair action, and process in the quality ticket.

It would have been obvious to one of ordinary skill in the art to modify Horejsi to log the repair suggestion and action as well as the identified process in the quality ticket. This would allow the repair process to be interrupted and resumed at a later time

Art Unit: 2125

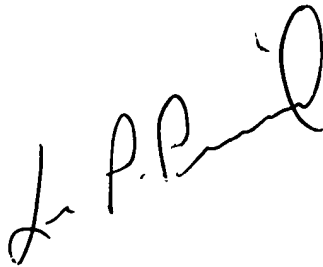

without having to repeat previously completed work and also allow the process to be identified at a later time.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baker et al. 4,847,795 and Horton et al. 5,533,093 are of interest in identifying defects.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven R Garland whose telephone number is 703-305-9759. The examiner can normally be reached on Monday-Thursday from 6:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard, can be reached on 703-308-0538. The fax phone number for the organization where this application or proceeding is assigned is 703-746-7239.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-3900.
